Amendments To Claims:

Amendments to the claims are reflected in the following listing, which replaces any and all prior versions and listings of claims in the present application.

Listing of Claims:

1. (Currently Amended) A system for membership enrollment comprising:

an enrollment system including an enrollment system server for processing user data in connection with a user;

a first supplier system for providing a first membership indicia to said enrollment system in response to said user data provided for enrollment in a first membership program;

a second supplier system for providing a second membership indicia to said enrollment system in response to said user data provided for enrollment in a second membership program, said second membership indicia different from said first membership indicia;

a readable storage device including a database for storing said first and second membership indicia, and said user data;

an enrollment system reader in communication with said readable storage device and said enrollment system server, said reader receiving said user data;

wherein said enrollment system reader notifies said user of <u>enrollment of</u> a third supplier system and <u>initiates a</u> request[[s]] <u>for</u> additional user data in response to <u>said</u> enrollment of said third supplier system <u>in order to be supplied to said third party supplier</u> ~~in said enrollment system~~.

2. (Previously Presented) The system according to claim 1, wherein said reader is in communication with said enrollment system for providing said user data to said first and second suppliers.

3. (Previously Presented) The system according to claim 1, wherein said enrollment system server provides said first and second membership indicia to said readable storage device, said readable storage device storing said first and second membership indicia in said readable storage device database.
